

VIVACOLOR® – Ihre Dekor-Kollektion

Design ohne Kompromisse

VIVACOLOR® bietet Ihnen ein komplettes Lagerprogramm an innovativen Dekoren und Oberflächen, welches die Wünsche und Ansprüche Ihrer Kunden optimal erfüllt. Die Dekore und Trägermaterialien stehen in einem harmonischen Zusammenhang. VIVACOLOR® ermöglicht Design ohne Kompromisse.

Dank VIVACOLOR® eröffnen sich Ihnen beste gestalterische Möglichkeiten für das kreative Arbeiten im Innenausbau. Die melaminharzbeschichteten Spanplatten bilden die Basis, Schichtstoffe und ABS-Kanten vervollständigen diesen Materialverbund. Der Anwender der VIVACOLOR® kann seinen Fokus auf die Dekorauswahl richten, die Verfügbarkeit der ausgewählten Dekore und Materialien zu attraktiven Konditionen ist garantiert.

Weichen Produkte vom Dekor- und Materialverbund ab oder befinden sich in einem anderen Preissegment, sind diese im VIVACOLOR® «Spezial» untergebracht.

SPA Aarau

Kompetenz in Holz

VIVACOLOR® Dekor- und Materialverbund

Dekorativ beschichtete Spanplatte

Rohspan als ökologischer Träger mit Holz aus der Kreislaufwirtschaft, bietet die optimale Grundlage für eine dekorative Beschichtung. Durch die heutzutage immer besseren Produkteverfahren können unzählige neue Oberflächenstrukturen angeboten werden. Dies wiederum bietet unbegrenzte Designmöglichkeiten für Planer und Verarbeiter. Im speziellen mit den Abstimmungsmöglichkeiten zwischen Dekor und Struktur werden Echtholz oder andere imitierte Materialien nahezu perfekt rekonstruiert.

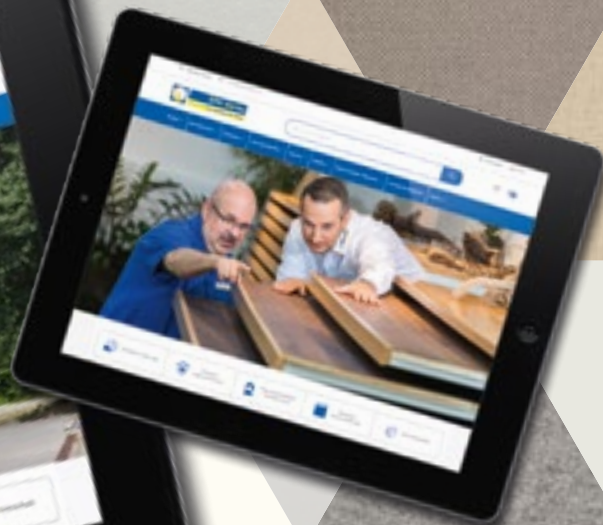

Schichtstoffplatten / Kunstharz

Harzgetränkte Kern- und Dekorpapiere verpresst ergeben einen Schichtstoff, welcher als HPL oder CPL bezeichnet wird. Dieser mehrschichtige Aufbau garantiert eine äusserst strapazierfähige Oberflächenqualität. Schichtstoffe bringen somit höchste Widerstandsfähigkeit und ansprechendes Design in Einklang. Sie lassen sich leicht auf individuelle Trägerplatten verarbeiten.

Rollenkanten

ABS-Kanten bestehen aus Kunststoff (ohne Chlorzusatz) und werden in einem speziellen Verfahren extrudiert. Sie bieten eine homogene Optik von Oberflächen und Kanten, vor allem bei angefrästen Radien. Die hohe Qualität zeigt sich in einer erhöhten Belastbarkeit, sie sind kratz-, stoss- und schlagfest. Unsere Kanten sind handverlesen und auf die Dekore abgeglichen.
