# VIVACOLOR® Dekor- und Materialverbund

## Melaminharzbeschichtete Spanplatten

Rohe Spanplatten als Träger werden mit einem Melaminharz getränkten Dekorpapier beschichtet. Sie sind ideal für den Innenausbau, wie z.B. für Schränke, Regale, Küchen, Sideboards, Betten usw. Melaminharzbeschichtete Spanplatten zeichnen sich durch ein optimales Preis-/Leistungsverhältnis aus.

## Schichtstoffe

Der Aufbau einer Schichtstoffplatte setzt sich grundsätzlich aus phenolgetränktem Kernpapier, einem beliebigem melaminbeharzten Dekorpapier und – je nach Dekor einem Overlay Papier zusammen. Dieser mehrschichtige Aufbau garantiert eine äusserst strapazierfähige Oberflächenqualität. Somit bringen Schichtstoffe den Anspruch an extreme Widerstandsfähigkeit und formschönes Design in Einklang.

## Dickkanten

ABS-Dickkanten bestehen aus Kunststoff (ohne Chlorzusatz) und werden in einem speziellen Verfahren extrudiert. Sie bieten eine homogene Optik von Oberflächen und Kanten, vor allem bei angefrästen Radien. Die hohe Qualität zeigt sich in einer erhöhten Belastbarkeit, sie sind kratz-, stoss- und schlagfest.
